FOR A MORE DESIRABLE YOU

The Surgery that Permanently Removes Excessive Fat in Both Men and Women

Introducing the new Ultrasound Assisted Liposuction (UAL).

We are the only clinic in New England offering the newest and most advanced method of liposuction. Many of us have developed troublesome, localized fat tissue that does not respond to diet or exercise. At the Liposuction Institute of Boston, we specialize in redefining the classic beauty in you. The surgery is performed in our state of the art outpatient facility, where we eliminate fatty areas permanently through Liposuction cosmetic surgery on such problem areas as: "saddle bag" thighs, "protuberant" abdomens, buttocks, "love handles," fatty knees, redundant elms and enlarged male breasts. If you are interested in enhancing your total appearance, please write for our free book entitled "Body Contouring" or call for a personal consultation. Ask about the New Lipo-Lipostabil &
